PROFILE

Full Stack Web Developer with hands-on experience in building responsive, scalable, and dynamic web applications using HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, React, Next.js, Tailwind CSS, and EJS. Currently pursuing BCA in Computer Applications (2025–2028).

Skilled in front-end and back-end development, API integration, and database management. Passionate about building clean, maintainable code and solving real-world problems.

Seeking freelance and collaborative opportunities to apply my skills in impactful web projects.

PROJECTS

Multi-Tenant E-Commerce SaaS Platform

- Developed a complete E-commerce web app with a product & COD payment system.
- Implemented Google authentication and admin dashboard for managing inventory.
- Implemented product reviews with images and real-time order tracking.

🔒 SecureVault - Password Manager

- Secure password manager with encrypted storage, Google authentication, and responsive dashboard. Built with Next.js, MongoDB, NextAuth, and Tailwind CSS.

💖 Donation Web App

- Full-stack donation platform with campaign management, Razorpay integration, and admin analytics. Built with Next.js, MongoDB, and JWT.

🔗 URL Shortener with QR Code Generator (Node.js, Express, MongoDB, EJS)

- Created a custom short link generator.
- Engineered an interactive QR Code generator using Node.js & MongoDB.
- Displays all short URLs and QR codes in an organized dashboard view.
- Tracks total click counts per link for analytics.

☀️ Weather App (HTML, CSS, JavaScript)

- Integrated OpenWeather API for live weather updates.
- Displays temperature, humidity, and wind speed dynamically.
- Clean and responsive user interface.
